

Skydiving – 100 % adrenaline

**4000 m height + 200 km/h speed + more than 30 sec. Free fall
= 100% adrenaline**

That's your equation for the ultimate kick – that's Skydiving!

A skydive begins with the check of the equipment and the theoretical instruction. The following flight in the helicopter or airplane is breathtaking. The blue lakes of Thun and Brienz, Eiger, Mönch and Jungfrau are very close, but then at a height of 4,000 meters it's time to EXIT.
